DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-13 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of copending Application No. 10/352,621. Although the conflicting claims are not identical, they are not patentably distinct from each other because claiming that the accessory device side identification data table is congruous with at least one part of the camera side identification data table, instead of both claiming that both tables are congruous with each other is broadening the scope of the claims allowed in the copending application 10/352,621. All the limitations of claims 1-13 in this application are fully met by the claims 1-13 of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

3. Claims 14-19 and 49-72 are allowed. The primary reason for allowance of claims 14-19 is the claim 14 limitation for a restricting section that inhibits/restricts operation of the camera

when compared identification data from the camera side and lens side congruous memories indicate that the dedicated accessory device is not mounted on the camera. The primary reason for allowance of claims 49-72 is the claim limitation for an arithmetic section on the camera side/and or the lens side for generating arithmetic data to be transmitted to the camera body from the lens side and/or a judging operation performed on the camera side using the arithmetic results from the lens side and camera side.
